Academy for Multilingual Immersion Studies	Cont. Imp.	Watch	Met	Met	81.3

## About the data

Once a year, Ohio rates public school districts and buildings using several measures, based on how well students perform on state tests and on attendance. High school ratings also reflect graduation rates. Elementary and middle school ratings include a “value added” goal – the expectation that the average student will show a year’s worth of academic growth based on test data. The federal government also requires that students make “adequate yearly progress” on state-set goals in reading and math in elementary, middle and high schools.

Here are several ways to evaluate your school and district:

**State Ratings:** The best is Excellent with Distinction, then Excellent, Effective, Continuous Improvement, Academic Watch and Academic Emergency. (Schools too long in Academic Emergency may have to offer additional tutoring or school choice.)

**Value Added:** Was the one-year progress goal met, or did students show growth above or below that goal?

**Adequate Yearly Progress (AYP):** The reading and math goals were either met or not.

**Performance Index:** Measures district and school test results for all grades and subjects, with higher points for advanced and accelerated student scores. Ranges from 0 to 120 points.
